## FOUR MILE PRODUCTION STATUS

Alliance Resources Ltd advises that a total of 559,691 pounds of uranium oxide concentrate (UOC) has been produced at FME01 and FME02 wellfields to 18 July 2014.

This equates to 150,136 pounds of UOC over 18 days, or 8,341 pounds per day, since the previous production status announcement (to 30 June 2014).

Production forecasts for July and August are 239,000 and 234,000 lb respectively.

Due to limited availability of maritime transport, the first sale of uranium from Four Mile has been delayed by a month and will not now arrive at the North American converter and be available for sale until mid-September 2014.

**Steve Johnston**  
**Managing Director**

The Four Mile Uranium Project area is located 550 kilometres north of Adelaide in South Australia. Alliance's 100% owned subsidiary, Alliance Craton Explorer Pty Ltd is the registered holder of 25% of ML6402 and EL5017. Quasar is the registered holder of 75% and acts as the manager of the Project.
